

MARWAN GAMAL

Flutter Developer

marwangamal931@gmail.com | 01007848336 | Giza, Egypt | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

Computer Science student with hands-on experience building and shipping Firebase-backed mobile applications in Flutter and Dart, including a bilingual (English/Arabic RTL) event management platform with real-time data sync and Google authentication. Comfortable across the full app lifecycle — UI implementation, state management with Provider, navigation, and backend integration — with a growing focus on clean architecture and reusable components.

EDUCATION

Undergraduate, Computer and Information Sciences

Expected 2027

- Misr University for Science and Technology (MUST), Egypt
- Relevant coursework: Software Testing, Digital Image Processing, Linear Algebra, Neural Networks & CNNs, Mobile Computing

EXPERIENCE

Mobile Application Developer — Route

Apr 2026 – Nov 2026

- Developing cross-platform mobile features in Flutter (Dart) and Native Android (Kotlin) as part of the mobile engineering team

Cross Platform Mobile App Developer — Digital Egypt Pioneers Initiative (DEPI)

Jul 2026 – Dec 2026

- Completing a hybrid internship building cross-platform mobile applications with Flutter and Dart under the Digital Egypt Pioneers Initiative

TECHNICAL SKILLS

- Languages & Frameworks: Dart, Flutter, Python, basic Kotlin/Java
- Backend & Data: Firebase Authentication (incl. Google Sign-In), Cloud Firestore, FastAPI, REST APIs
- State Management & Architecture: Provider, bilingual/RTL UI localization

PROJECTS

Evently — Bilingual Flutter Event Management App

- Built a bilingual (English/Arabic RTL) event management app backed by Firebase, using Cloud Firestore, Google Sign-In, and Provider for state management
- Implemented event creation and editing, a multi-screen onboarding flow (PageView + persisted preferences), and a HomeTab with live Firestore streaming
- Resolved complex Firebase integration issues, including a Google Sign-In v7 API migration and Firestore security-rule and query bugs

News App — Flutter News Reader

- Built a news reader app featuring an article detail screen, a bottom-sheet article preview, and debounced search
- Integrated `url_launcher` for opening external article links directly from the app
- Resolved Android Gradle Plugin, Gradle, and Kotlin version compatibility issues during setup

Jacked — Flutter Workout Tracker App

- Built a fitness tracking app in Flutter for logging workouts, exercises, and sets/reps over time
- Designed an intuitive UI for tracking training progress, applying the same clean state-management patterns used across other projects

LANGUAGES

- Arabic — Native
- English — Fluent
