EDUCATION

Sohar University	Sohar, Oman
Bachelor of Software Engineering	2023 – 2026

EXPERIENCE

Code Buddy Oman	Sohar, Oman
Software Engineering Intern & Team Lead	Feb 2025 – Oct 2025

- Managed back-end and mobile app teams, setting KPIs, conducting technical workshops, and leading monthly progress reviews directly with the CEO.
- Independently built and launched **Manssat Sanad**, a bilingual business management platform with multi-role access, VAT-aware expense tracking, and transaction management using PHP and MySQL.
- Developed **PrettifyMe**, a Flutter-based salon management application, and contributed to the Shuaa Project.

<i>Mobile Application Developer Intern</i>	Aug 2024 – Sep 2024
--	---------------------

- Developed the front-end of a mobile ERP application using Flutter and GetX for both Android and iOS.
- Designed responsive, user-friendly interfaces with animations, collaborating effectively with cross-functional teams to ensure smooth implementation.

Sohar University	Sohar, Oman
Peer Tutor	Jan 2025 – Apr 2026

- Guided students in Operating Systems, Algorithms & Data Structures, Web Information Systems, and OOP over three academic semesters.
- Assisted with assignments, exam preparation, debugging, and strengthening core coding and problem-solving skills.

INTAJ SUHAR FOR ADVANCED MANUFACTURING LLC	Sohar, Oman
Web Development Intern	Apr 2024 – Jun 2024

- Designed and developed a responsive, cross-platform website using Wix to enhance digital presence.
- Optimized layout, navigation, and UX, successfully managing project timelines and stakeholder requirements.

PROJECTS

Huda – Islamic Companion App <i>Flutter, GetX</i>	Play Store App Store
--	--

- Developed a comprehensive mobile app featuring a Quran module, accurate Qibla, location-based prayer times, and a Hadith collection.

- Integrated "Huda AI", an Islamic AI assistant providing text responses grounded in the Quran, and designed a robust UI supporting both dark and light themes.

Sire – Multi-role E-commerce Platform | *Flutter, PHP*

[GitHub](#)

- Built a full-stack platform for customers, delivery personnel, and admins with GPS address management and live order tracking functionalities.
- Implemented complex functionalities including coupons, analytics, and multi-language localization (Arabic, English, Spanish).
- Designed with a modular architecture and securely licensed under the PolyForm Noncommercial License.
