PROFESSIONAL SUMMARY

Computer Science student and Flutter developer who builds Firebase-backed mobile applications in Flutter and Dart, including a bilingual (English/Arabic RTL) event management app with real-time data sync and Google authentication. Experienced in UI implementation, state management (Provider, Bloc/Cubit), navigation, and backend integration, with a growing focus on clean architecture and reusable components.

TECHNICAL SKILLS

Languages: Dart, Python, Kotlin (basic), Java (basic)

Frameworks: Flutter

State Management & Architecture: Provider, Bloc/Cubit, Riverpod, MVVM, StreamBuilder, Localization (English/Arabic RTL)

Backend & Data: Firebase Authentication (Google Sign-In), Cloud Firestore, FastAPI, REST APIs (Dio), Hive, Shared Preferences

EXPERIENCE

Cross Platform Mobile App Developer | Digital Egypt Pioneers Initiative (DEPI) | Jul 2026 – Present

- Building cross-platform mobile applications with Flutter and Dart as part of a hybrid internship program.

Flutter Mobile App Developer | Route Academy | Apr 2026 – Present

- Building cross-platform mobile applications with Flutter and Dart as part of a hybrid internship program.

PROJECTS

Evently – Bilingual Flutter Event Management App | Flutter, Dart, Firebase, Cloud Firestore, Provider

- Built a bilingual (English/Arabic RTL) event management app backed by Firebase, using Cloud Firestore, Google Sign-In, and Provider for state management.
- Implemented event creation and editing, a multi-screen onboarding flow, and a home tab with live Firestore streaming.
- Resolved Firebase integration issues, including a Google Sign-In v7 API migration and Firestore security-rule and query bugs.

News App – Flutter News Reader | Flutter, Dart, REST APIs, BlocCubit

- Built a news reader app with an article detail screen, a bottom-sheet article preview, and debounced search.
- Integrated url_launcher to open external article links directly from the app.
- Resolved Android Gradle Plugin, Gradle, and Kotlin version compatibility issues during project setup.
